

Project management made simple

Verto^{Plus} is an out-of-the-box project management software solution which enables you to:

Have interactive live dashboard reporting

Launch your projects faster

Work in one organised space

Keep everyone in the loop

Spend less time in meetings catching up on 'where we are'

Manage all your risks, issues and milestones in one easy to use system

Verto gives you all the information you need on the status of all active and proposed projects. It is a single location for files, to-dos, timelines and keeps everyone up to date with what's going on even when they are on the move.

Verto is a system that lets everyone see what is being worked on and enables them to work on the same documents at the same time, making a huge difference to how the project comes together. It's an easy to access, easy to use single version of the truth.

Live interactive dashboards give you, your stakeholders and your teams accurate, up-to-date information in a visual form enabling impressive presentation of key data to management teams, stakeholders and senior responsible officers. It also allows programme managers, project managers and their delivery teams to focus on delivering the work needed to achieve the outcomes, without getting bogged-down in detailed processes and repetitive tasks such as double key entry of data.

VERTO IS USED BY OVER 60,000 PEOPLE

We are a UK based Company established over 10 years ago and we have been trusted to manage and host data for more than 100 public and private sector clients with combined project spend of over £6bn managed through Verto.

Some of the benefits of using Verto^{Plus} and Verto^{Pro} our customers have identified include:

Collaboration

- Reduced reliance on email and excel has saved a huge amount of time
- Enables us all to work on the right version of a document
- Cloud based system so access is 'on the move'
- Mobile app VertoGo is on ios and android and can manage all the approvals and notifications
- Search tool and tagging function makes finding everything really easy
- Creates a visual map of inter-dependencies allowing greater transparency and better control

Key features

- ✓ File Sharing
- ✓ Alerts & Notifications
- ✓ Mobile App
- ✓ Chat & Instant Messaging

Reporting

- Great live and interactive dashboard at the press of a button
- Out of the box reporting and access to a suite of custom reports has saved time
- Produces simple, easily accessible gantt charts for mapping activities and scheduling
- Excellent tracking and management of cost savings and financial and non financial benefits
- Real time access makes presentations 'live' which has really impressed our management team

Key features

- ✓ Real-time reports
- ✓ Interactive dashboard
- ✓ Timesheets

Project management

- Removes the need for 'double keying' data as all input now written to the database
- Provides a 'one stop shop' for all our project information providing much better visibility of our projects
- Effectively creates a consistent approach to managing small and large scale projects
- Manages all the approvals within one system and provides an auditable log
- Tracks all key tasks, milestones and risks and then allows us to easily report on them
- All the templates are readily accessible now and all held in one place

Key features

- ✓ Highlight Reporting
- ✓ Tasks & Milestones
- ✓ Gantt charts
- ✓ Approvals & change requests
- ✓ Project Hierarchies
- ✓ Resourcing
- ✓ Costs & Benefits

Integrations

- SharePoint
- Single sign-on
- MS Project
- Finance Systems (e.g. SAP, Agresso)

Everything from approvals to real-time updates available at your fingertips
